

STUDENT HEALTH SERVICES

Health services are an integral part of comprehensive school improvement, assisting all students to increase learning, achievement, and performance. Health services coordinate and support existing programs to assist each student in achievement of an optimal state of physical, mental and social well being. Student health services ensure continuity and create linkages between school, home, and community service providers. The school district's comprehensive school improvement plan, needs, and resources determine the linkages.

Nurses and other medical personnel employed by or requested to conduct services for the board shall hold and maintain a current Iowa license and meet the requirements of the State Department of Education if required by the school district.

The superintendent, in conjunction with the school nurses, will develop administrative regulations implementing this policy. The superintendent will be provided with an annual written report on the role of health services in the education program.
