

WARNING SYSTEM AND EMERGENCY PLANS

The school district shall maintain an emergency warning system designed to inform students, school district employees, and visitors in the building of an emergency. This system shall be maintained on a regular basis under the maintenance plan for school district facilities.

The district will develop a crisis management and response plan in collaboration with local emergency responders (police, fire, etc.). The plan will include the following components: prevention, mitigation, response, and recovery.

A district safety committee will be given the responsibility of reviewing the plan annually. The results of the review will be reported to the superintendent and board of directors with recommendations for revision and improvement. Copies of the plan will be kept in each building.

Students shall be informed of the crisis management and response plan. The plan shall provide help for those in need of assistance to safety during an emergency. This shall include, but not be limited to, disabled students and personnel.

Licensed personnel shall be responsible for instructing the proper techniques to be followed during an emergency. It shall be the responsibility of the superintendent to develop administrative regulations regarding this policy.
